

PRODUCT'S TECHNICAL DATA SHEET

DATA CONCERNING THE PRODUCER

Altino pane S.r.l – Treviso (TV)
Factory: Via Mazzon 8, - Quarto d'Altino (VE)

PRODUCT'S TRADE NAME

Tramezzino integrale («whole-wheat tramezzino» bread)

SALE DENOMINATION

«whole-wheat»-type of bread - frozen

DESCRIPTION

Loaf of bread, sliced, crustless, frozen

PRODUCT CODE : 02I

INGREDIENTS

Soft-wheat type «0» **flour**, water, **whole-wheat flour**, lard emulsified (water, dextrose) 3.5%, salt, ,fresh yeast, **soya flour**, **malted wheat-flour** emulsifying agent E471.

Allergens: cereals containing gluten, soya

PRODUCTION TECHNOLOGICAL PROCESS

The applied bread-making process is the traditional one: the mixed ingredients are used to produce a dough that undergoes kneading and two leavening processes that last approximately 20 hours. The dough is automatically separated into smaller portions that are put inside bread pans. Each dough portion equals one bread loaf and weights about 2450 g. Once baked, the obtained bread loaf is deprived from its crust and it is sliced automatically. The thus obtained slices are then automatically packed. The packaging process takes place in a separated environment subject to absolute air filtration. Packed in this way the product undergoes the freezing process in an adequate blast freezer unit.
